

Initial Operation Schematic

Training
How much Data sets ?? $\swarrow$ $\searrow$ ^{external} with external contact
without external/uncontact
 $\downarrow$
Train the model using offline data from ^{shared} sensors
 $\downarrow$
use trained model for real time implementation

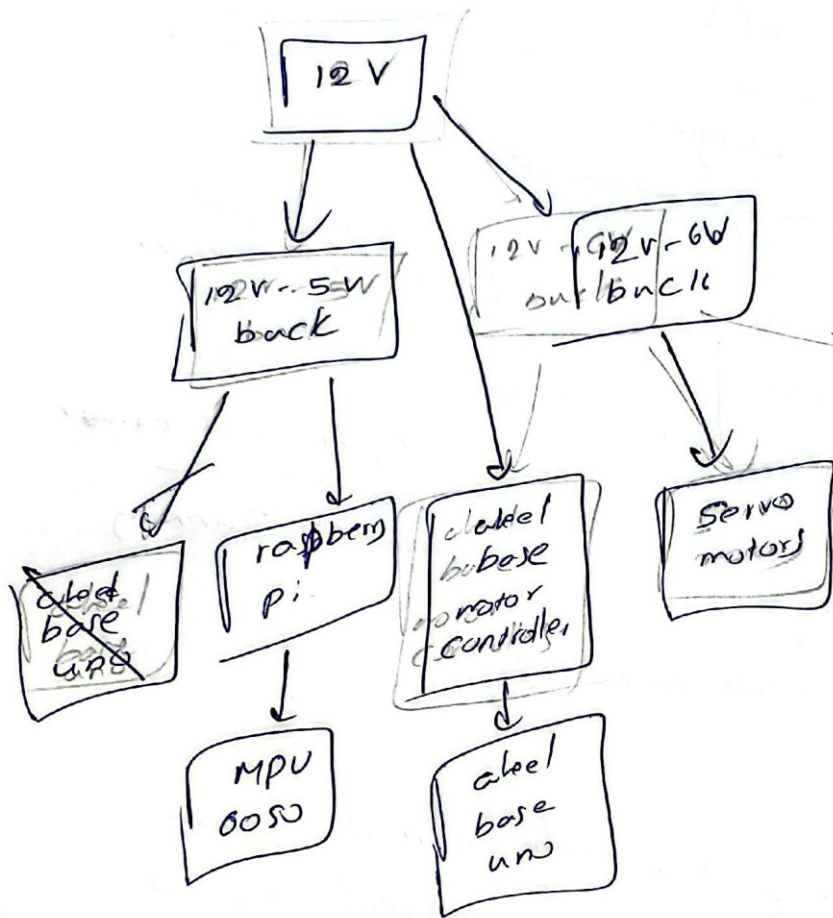

Phase 1 $\rightarrow$ using 1 antenna
Phase 2 $\rightarrow$ using 2 antennas

Initial Wiring Schematic

raspberry pi $\rightarrow$ 5V
wheel base $\rightarrow$ 6V-12V
uno $\rightarrow$ 5V
motor controller $\rightarrow$ 6V-12V
servos need to power separately

12V battery pack

Initial Hardware Schematics for 3D Printing
